Logan Reed | Resume

- Status: M.S. Mathematical Sciences, Data Scientist
- Fields: Software Development, Mathematical Research, Data Visualization
- Tech: Python, Pandas, Numpy, Scipy, Scikit-Learn, Linux, SQL, Git, AWS
- Loves: Snowboarding, E-Sports, Boxing, Homotopy Type Theory

Education

2021 - 2023 **Master of Science in Mathematical Sciences** Rutgers University

- Recieved the "Outstanding Scholarship" and "Distinguished Thesis" awards. 3.96 GPA

2017 - 2021 **Bachelor of Science in Applied Mathematics** Texas State University

- Minored in Computer Science, 6 time Dean's List recipient. 3.72 GPA

Experience

2022 - **Software Developer / Researcher in Biosciences Lab** Rutgers University

- Collect and clean biological data using Pandas
- Optimized the system via Numpy and Scipy, maintained CI/CD pipeline
- Scrum environment with interdepartmental team, produced published visualizations

2021 - **Part Time Lecturer** Rutgers University

- Developed diagnosis software to extract detailed information for individual exercises.
- Analyzed data to adapt lectures, predict grades, and recommend exam questions

2020 - 2021 **Programmer / Assistant in Computational Number Theory** Texas State University

- Converted pure math to MatLab/python, created interactive visualization using Jupyter
- Combined and converted unstructured databases to an SQL database

Projects

2023 **Graduate Thesis** Rutgers University

- Generate novel data about PDEs, utilize parallel distributed cloud computing
- Build a robust DevOps pipeline to mitigate extreme computation costs
- Utilize CUDA and C's numerical linear algebra libraries to optimize costly routines

2022 **Personal Server**

- Custom server utilizing Linux and Docker Compose to host web apps via a reverse proxy
- Automatically updates images and creates backups

2022 - **Competitive Smash Bros. Melee Analysis**

- Scraped match data, cleaned the data to remove errors and users without matches
- Analyzed trends in players/characters, contributed to related computer vision project
- Implemented prediction using regression analysis
